(SECOND FLOOR.)

PROF. OF OPTICS

LATE OF BERLIN, PRUSSIA.

IMPORTANT NEW INVENTION.

AUSTRALIAN CRYSTAL.

SINGLE AND DOUBLE VISION

SPECTACLES.

THE ONLY PERFECT LENS IN EXISTENCE. Superior to any other in use—constructed in accordance with the science and philosophy of nature in the pecu-liar form of a

CONCAVO-CONVEX ELLIPSIS. Admirably adapted to the Organ of Sight, and perfectly natural to the oye, affording altogether the best artificial help to the human vision ever invented.

Sold only by the Professor of Optics and Specatcle Manufacturer.

THE ADVANTAGES

lat.—The only true Lens known, being perfectly free from chromatic light so well known to be the cause of injury to the vision, and which makes the change from Spectacles to Glasses of stronger powers so often required, while both near and distant objects are seen with equal facility through the same Glasses.

2d.—Can be worn with perfect case for any length of time at one sitting, giving astonishing clearness of vision, particularly by candle or other artificial light—comfort to the spectacle wearer hitherto unbown.

3d.—When the eyes ache or pain through the action of a bright light, such as is reflected from snow, sunny weather, white paper, and in reading, writing or sewing, or vivid colored bodies, these lenses, by softening ther aye, effect a most agreeable sensation and give greatres ief.

Ath.—In all nervous affections of the eye causing duil and startling pains in the eye-ball or temple, appearance of luminous and dark spots in the atmosphere, aching or teeling like sand in the eye, the disturbed nerves are quieted and soothed.

5th.—Ground by peculiar machinery, got up at great cost, mathematically calculated expressly for the manufacture of this lens, so as to produce it with the true spher cal accuracy, and its focus is at the exact centre, a point of vital importance, and which no other lens possesses.

6th.—Proof of superiority over the old kind of Spectacles. They are used exclusively at all the hospitals for diseases of the eye, in Berlin, Prussia, and sleawhere.

TESTIMONY OF RECOMMENDATIONS

From Medical gentlemen, Professors of the highest Opthalmic talent in Charleston, S. C., and in the Union.

CHARLESTON, S. C., May 28th, 1866.

CHARLESTON, S. C., May 28th, 1866.

I have examined a great variety of Glasses manufactured by Professor M. Beinhardt, and in justice to the Professor must say, that his Glasses are of a superior quality, adapted to neet the wants of almost overy eye, whore the vision is in any way imperfect. The Professor selected for me a pair of his Australian Crystal Glasses which are of a very superior quality and workmanship, rendering vision very distinct, almost as perfect as in youth. I yield this testimony in favor of the Professor's Glasses most cheerfully.

E. GEDDINGS, M. D.

I cheerfully concur in the opinion above expressed of the value of Professor Bernhardta' Givsses, and their adaptability to all defects of vision, and also to his skill and judgment in adapting the glass to each special im-perfection.

H. W. DESAUSSURE, M. D.

CHARLESTON, S. C., May 28th, 1886.

I do most willingly bear my testimony in favor of the superiority of the Australian Crystal—single and double vision spectacies over all other kinds. They are constructed upon the best established and understood principles of optics, and their adaptation to the human eye in its different conditions of vision is so perfect, as to render sight easy without effort. In my opinion, none others should be used since the eyes once used to those do not seem to grow old, and by having a focus at any point of the surface, they appear to rest o'er the eyes to their youthful energy.

T. L. OGIER, M. D.

CHARLESION, S. O., May 28th, 1866.

I have examined Professor Bernhampts' very complete assortment of Spectacles and Longes. They are better adapted than any I have before seen to remedy the imperfection of vision that can be benefited by the use of Glasses. The pureness and clearness of the Crystal used, is an item worthy of special attention, at I can testify from tersonal experience. I recommend Professor Bernhampt with confidence and great cheerfalness, to the patronage of the public.

JAMES P. JERVEY, M. D.

CHARLESTON, S. C., May 28th, 1966.

Of these Spectacles over all others, are :

STATE OF SOUTH CAROLINA,

EXECUTIVE DEPARTMENT,

Columbia, June 19, 4866

Sir: I have made full and satisfactory test of the
spectacles procured from you, and I have the pleasure
to say that the glasses are better sdap'ed to my eyes
than any I have ever used. The facility with which you
tited the glas to my eye furnish d me couclusive evidence of your scientific skill in optics and your thorough
experience as an oculiet.

Your attainments in your profession entitle you to
the confidence, patronage, and gratitude of the public.

I have the honor to be,

Very respectfully yours.

JAMES L. ORR,

Governor of South Carolina.

Prof M. Bernhardt, Charleston, S. C.

OHARLESTON, S. C., May 28th, 1866.

We have examined the Lenses of Prof. Bernhamdt, and consider them superior to say we have reen. They are animirably adapted not only to improve the imperfections of impaired sight, but to reduce the wearliness of vision which constant study produces. Many of the disasses are of new and ingenious contrivates. We cordially recommend the Professor to all those who require scientific optical assistance.
